Further information on the planned upgrade to the BAM Calculator

A number of upgrades and essential maintenance to the BAM Credit Calculator (BAM-C) is scheduled from 3:30-4:30pm today (Thursday 4th July). Please note that the BAM-C and the Biodiversity Offset Agreement Management System (BOAMS) will be unavailable during this time.

The upgrades will improve the functionality and useability of the BAM-C for Accredited Assessors. We have prepared the attached *Release notes – Upgrades to the BAM Credit Calculator* which will provide you with additional information and instructions.

During the outage, the threatened flora species, *Thelymitra alpicola* will also be imported as a candidate species into the biodiversity dataset accessed by the BAM-C.
